A technical drawing of a trapezoidal object, likely a cross-section of a mechanical part. The object is symmetrical about a vertical centerline, indicated by a dashed line. The top surface is flat, and the bottom surface is also flat. The sides are sloped. A central rectangular notch is cut out from the top. The interior of the object is filled with diagonal hatching lines, sloping downwards from left to right. Two small rectangular features, possibly holes or slots, are located on the top surface, one on each side of the centerline.
